CASE IH

## NUTRI-PLACER® 930 & 940

2 Models | Working Widths: 27.5–65 Ft.

Nutri-Placer 930 and 940 pull-type nutrient applicators are designed to **improve the productivity of every pass**. Built to the standard of professional producers and commercial applications, the Nutri-Placer family is **made for high-speed, minimal soil disturbance and precise nutrient management** so you can cover more acres in a day.

**NUTRI-PLACER 930 & 940 PULL-TYPE NH<sub>3</sub> APPLICATOR**

Nutri-Placer 940 Specifications . . . . . 14–15

# BUILT FOR HIGH-EFFICIENCY FARMING

With three row unit options, commercial quality frame and 15-, 20- and 30-inch spacing options, the rugged toolbar of the Nutri-Placer 930 and 940 can be **tailored specifically to your farm or business.**

## NUTRI-PLACER 930

- Single fold or double fold transport modes.
  - 27.5, 32.5 and 37.5 feet – single fold
  - 42.5 and 47.5 feet – double fold
- The front pull hitch features **4×10-inch tubes with 3/8-inch wall thickness.**
- 4×8-inch cross/support tubes with a **5/16-inch wall thickness provides high toolbar durability.**
- CAT III, IV or V front hitch **clevises to match tractor pin size.**
- Toolbar fore/aft levelness quickly adjusted by adjusting front clevis position.
- Available in **pre-plant or side-dressing** configurations.

## NUTRI-PLACER 940

- Double fold or triple fold transport modes.
  - 50 feet – double fold
  - 60 and 65 feet – triple fold
- Excellent transport widths – Up to 65 feet working width that transports to 18 feet 9 inch
- Welded cross/support tubes **add strength and stability.**
- Three ranks of tubing run the width of the toolbar for increased strength. Staggered coulters and row units **provide better residue flow.**
- **Simple and reliable fore/aft leveling** with a front hitch mounted turnbuckle.
- T-bone style front hitch **provides tight turning radius.**

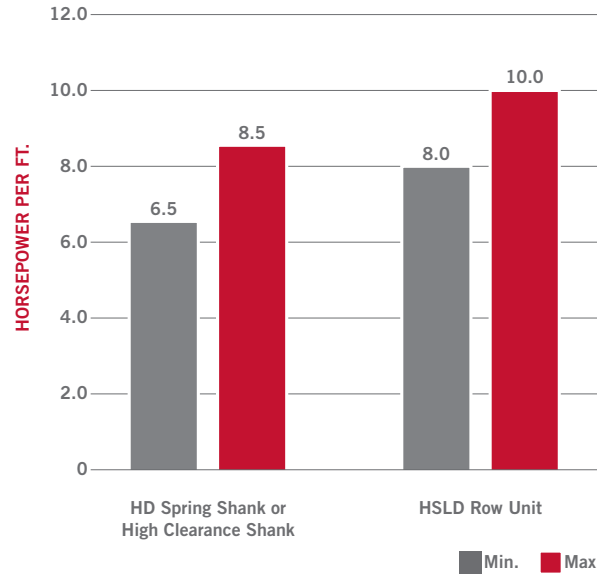

## 930 & 940 COMMON SPECS

- Shank models available in **15-, 20-inch (930 only) or 30-inch** row spacing.
- Steel bridge construction **sets the industry standard for durability.**
- Our welded bridge construction **results in a stronger frame.**
- Rounded gussets provide **increased toolbar strength.**
- Three ranks of tubing add strength and stability to the row unit. This also gives you the **flexibility to stagger coulters** and row units for **improved crop residue flow and faster operating speeds.**

### ACRES PER HOUR CHART

### HP REQUIREMENTS CHART

### RIGHT PLACE, RIGHT TIME

- Proud partner of the 4R Nutrient Stewardship initiative.
- Promotes best management practices to achieve cropping system goals while **minimizing field-nutrient loss and maximizing crop update.**
- The Nutri-Placer 930 and 940 embody the 4R approach to nutrient stewardship by:
  - Applying the right fertilizer source
  - At the right rate
  - At the right time
  - In the right place

# INCREASE PLANT FOOD AVAILABILITY

The Nutri-Placer 930 and 940 shank and sealer options feature the **durability, productivity and agronomic performance** you can depend on to make the most of every acre, every application.

## 1×2-INCH SHANK

- **HD spring shank**
  - Single 850 lb. spring mount
  - Auto reset design for knife, shank and toolbar protection
  - 1×2-inch shank
  - Side-mounted knife
  - Available on both the Nutri-Placer 930 and 940 models
- **Rigid mount shank**
  - 1×2-inch shank
  - Effective and value option for conditions without rocks
- **C-S rigid or spring mount shank**
  - 20-inch coulter for a compact design
  - 1×2-inch shank
  - Side mount knife design

## HIGH CLEARANCE SHANK (HCS)

- HCS (High Clearance Shank) mount **designed for the toughest field conditions.**
- 1-1/4×2-inch edge-bent shank.
- Features sealer mounting holes **for accurate and consistent sealer positioning.**
- Auto-reset design for added **protection for the knife, shank assembly and toolbar.**
- **Holding force adjustable** to either 850 lb. or 1,250 lb.
- Center mounted knife **with shear protection.**
- **High, under frame clearance** for residue flow.

## A COULTER THAT MAKES THE CUT

- Large, 24-inch coulters slice through tough residue, leading the way for the shank and knife to **accurately place valuable nutrients**.
- **Mounting and a set-screw design** lock in depth settings.
- The **spring coulters swivel** to meet field conditions.

## SEAL WITH CONFIDENCE

- 14-inch or 18-inch **reversible spring double disk sealers** available on 1×2-inch shank.
- Durable and versatile sealers that **offer two disk blade mounting options** for use with the 1×2-inch shank options.
  - The standard position offers more aggressive sealing
  - The reversed position leaves more residue on the surface while directing loose soil over the knife slot
- Extra spring down pressure **reduces sealer bouncing** and the durable H-frame **allows for numerous mounting positions**.
- 1/2×2 1/2-inch steel arms **retain position in rugged field conditions**.

## HEAVY-DUTY SEALING

- 18-inch reversible spring double disk sealers on HCS shank.
- Heavy-duty version of the 14-inch sealer is **built stronger to handle the larger blades**.
- Notched or dull blades available for both the **1×2-inch shank or HCS shank options**.
- Added spring pressure provides the needed down pressure for **smooth even sealing of the slot**.
- Heavier 1-inch diameter **hardened bushing pivot**.

# MAXIMUM PRODUCTIVITY, MINIMAL SOIL DISTURBANCE

Capable of speeds up to 11 mph, the High-Speed Low Disturbance (HSLD) coulters option helps you cover acres fast and efficiently. In field testing, the HSLD coulters provided **better residue cover and a more level surface finish than other coulters-style applicators available** — properly sealing nutrients to lock in each crop's profit potential.

## WHERE PRODUCTIVITY MEETS PERFORMANCE

- The Nutri-Placer HSLD **places nutrients up to 6-inch deep in the root zone**—when and where crops need it most.
- New 22.6-inch single coulters **cuts through residue with minimal soil disturbance** for improved nutrient retention.
- **Industry's highest speed capability** provides increased acres per hour, lower tractor hours and reduced fuel consumption.
- Cast-iron **components and reduced maintenance** keep you in the field.

## CREATE THE PERFECT FIELD FINISH

- Cuts through **heavy residue without plugging** — even at high speeds and in tough, fast-changing conditions.
- In Case IH field testing, the Nutri-Placer HSLD **provided better residue cover, significantly fewer clods and reduced lateral soil movement** compared with competitive coulters-style applicators.
- **Uniform surface finish** preserves valuable ground cover in highly erodible land and heavy, no-till corn conditions.
- Improves soil and moisture retention to reduce **run-off and maximize crop uptake**.

## LOW SOIL DISTURBANCE

- **Preserves valuable ground cover** in highly erodible land and heavy, no-till corn conditions.
- Provides the **opportunity for fall, preplant or earlier side-dress applications**.
- **Superior field finish** increases nutrient uptake, minimizes runoff and delivers higher returns.

### HSLD COULTER

A 22.6-inch, single-disk coulters cuts through residue with minimal soil disturbance up to 11 mph. The 4-degree blade angle opens a precise slot for **accurate nutrient placement** while right and left coulters positioning delivers **accuracy down to each individual row.**

### WIPER WHEEL

While the coulters opens a slot, the wiper wheel holds soil in place. The **open design of the wheel eliminates soil and residue** between the scraper and coulters blade.

### KNIFE

The cast-iron, spring-loaded knife features carbide inserts for wear and protection of fertilizer tubes. A separately replaceable, extra-long **Beaver Tail design with tungsten carbide weld aids in sealing.**

### CLOSING SYSTEM

The SharkTooth® blade and walking tandem press wheel firm the soil as the implement rolls through the field. This system works on a pivot to **closely follow the ground contour, minimizing closing disturbance.** No-tools-required spring down pressure and pivot range adjustments make changes quick and easy.

# COMMERCIAL GRADE FEATURES THAT KEEP YOU IN THE FIELD LONGER

Made for operations of any size, the Nutri-Placer 930 and 940 toolbars meet the needs of today's high efficiency farming practices.

## MAXIMUM FLEXIBILITY

- Excellent ground following capabilities.
- Three section flex on Nutri-Placer 930 models.
- Five section flex on a Nutri-Placer 940 models.
- Simple hydraulic wing fold provides **narrow transport** for all models up through 65 feet working widths.

## HYDRAULIC SINGLE POINT DEPTH CONTROL

- Provides **quick and easy depth adjustments** and is standard on all Nutri-Placer 930 and 940 models.
- **Adjustment handle** in center of the main frame with decal to advise turns.
- **Depth adjustment** across entire toolbar width.
  - Turn handle clockwise for deeper depth
  - Turn handle counterclockwise for shallower depth
- **Independent and tool-less adjusted leveling control** for inner and outer wing gauge wheels provides greater simplicity and durability.

## CONSTANT LEVEL REAR HITCH

- Optional on all Nutri-Placer 930 and 940 units.
- **Rear hitch swings and can be extended out** in order to facilitate hitching a tank for simple hook-up.
- **25,000 lb. (11 340 kg) hitch towing capacity** due to the strong 5×5×5/16-inch tubing that extends up to the torque tube and mainframe support tubes.
- Replaceable poly wear pads on the support/contact points of the hitch **allow the hitch to easily move side to side and front to back** when needed.
- 1 1/4×4-in. thick hitch bar.

### SMOOTH RIDE AT HIGHER SPEEDS

- Stubble-resistant, high flotation radial tires standard on applicators equipped with shanks.
- Stubble-resistant, high flotation radial tires standard on all HSLD units.
- **Walking tandems on both mainframe and wings** move independently and maintain contact with the ground, providing a smoother ride.
- **Single wheels available** for side dress applications.

### LED LIGHTING

- Provides bright, reliable, and safe transport.
- Amber warning lights mounted to the front.
- Red rear brake lights are found at the rear of the mainframe.

### STABILIZER WHEELS

- Double fold models feature frame **mounted gauge wheels** for smooth operation.
- **Quickly adjust position** with a few turns of the handle.
- **Hold the gauge wheel in position** with the large pin.

# NUTRI-PLACER 930 PULL-TYPE FERTILIZER

Available on a rugged 4-by-6-foot frame and in five widths ranging from 27.5 to 47.5 feet, the Nutri-Placer 930 has **proven ground-engaging components for optimal anhydrous ammonia placement**. From the hydraulic single-point depth control to double fold wing cylinders and radial tires, the Nutri-Placer 930 **easily moves from field to field, helping you cover more acres efficiently**.

# NUTRI-PLACER 940 PULL-TYPE FERTILIZER

The Nutri-Placer 940 allows you to **take control of your nitrogen application**. These tough, durable applicators offer commercial quality 6×6-inch frames available in five widths ranging from 50 to 65 feet. **Single-point depth control and a constant level rear hitch provide safe, reliable hook-up**. You also get to choose from a variety of agronomically designed coulter or shank and sealer options to **deliver uniform depth and sealing**.
