# RAIN BIRD®

Introducing Rain Bird MCA for Golf Pump Stations
Monitor – Control – Alert

Communicate with your Golf Pump Stations from Anywhere

No need to run to your pump house when you have Rain Bird MCA.
Access all your pump stations through one dashboard.

Map/Satellite or list views enable you to see the locations of all your pumps

Monitor
- View pump pressure, flow and speed – Save time
- See run-time and station status – Improve efficiency
- Review standard and personalized reports – Gain insight

Control
- Start and stop a pump station – Manual override
- Manage multiple stations from 1 device – Complete oversight
- Schedule daily, weekly or monthly reports – Make decisions with data

Upgrade with our easy to install hardware

Alert
- Immediate notification of alarms or faults – Never be caught off guard
- Notification of cleared alarms – Assurance of action
- SMS and/or email alerts to multiple users – Keep team informed

Rain Bird MCA is available on new stations and as a retrofit solution for most existing Rain Bird stations.

Improve water window efficiency ➔	Lower electric and water costs
Automate system fault procedure ➔	Never lose an irrigation cycle
1 year subscription included on all installs ➔	1, 3, and 5 year contracts available

Rain Bird MCA for Golf Pump Stations
Monitor – Control – Alert

Easy to view reports of system flow, pressure, and VFD speed

Quickly monitor and track runtime and applied volume

Rain Bird panels with MCA are the intelligent solution for those with aged controls looking to upgrade to the latest golf pump station control.

*Examples above are computer generated and represent optimized operating conditions.
Rain Bird MCA with Smart Pump™ can help optimize pump station use for longer motor life and watering efficiency.
